ECO362A (MAJOR) **Student's Copy**

2026

(NEP—2020)

(6th Semester)

ECONOMICS (MAJOR)

(Demography)

Full Marks : 75

Time : 3 hours

The figures in the margin indicate full marks for the questions.

(SECTION : A—OBJECTIVE)

(*Marks* : 10)

Tick (✓) the correct answer in the brackets provided : 1×10=10

1. What is the key objective of population studies in relation to sustainable development?

(a) To increase resource consumption regardless of population size ( )

(b) To promote development by balancing population with resources ( )

(c) To ignore the consequences of population change ( )

(d) To prioritize urbanization over environmental health ( )

2. Which stage of demographic transition is also called the stage of population explosion?

(a) Stage 1 ( ) *(b)* Stage 2 ( )

(c) Stage 3 ( ) *(d)* Stage 4 ( )

3. Who is responsible for conducting the Census in India?

(a) The Ministry of Health and Family Welfare ( )

(b) The National Statistical Office ( )

(c) The Office of the Registrar General and Census Commissioner, India ( )

(d) The Planning Commission of India ( )

4. The Nodal Agency for the National Family Health Survey (NFHS) is

(a) the International Institute for Population Science (IIPS) ( )

(b) the Ministry of Health and Family Welfare ( )

(c) the National Statistical Office ( )

(d) the World Health Organization ( )

5. What is the frequency of Civil Registration Data release in India?

(a) Annually ( ) (b) Monthly ( )

(c) Every 5 years ( ) (d) Every 10 years ( )

6. What is the replacement level fertility rate?

(a) 1·1 children per woman ( )

(b) 1·5 children per woman ( )

(c) 2·0 children per woman ( )

(d) 2·1 children per woman ( )

7. What was the percentage declined in the birthrate from 2024 to 2025?

(a) 3·74% ( ) (b) 1·19% ( )

(c) 0·94% ( ) (d) 1·16% ( )

8. Which of the following is the correct mathematical representation for finding the TFR?

(a) $TFR = \Sigma ASFR / 1000 \times 5$ ( )

(b) $TFR = \Sigma ASFR \times 1000 \times 5$ ( )

(c) $TFR = (\Sigma ASFR \times 5) / 1000$ ( )

(d) $TFR = (ASFR + 5) / 1000$ ( )

9. According to Women Empowerment Slogans, what happens when you restrict a woman's growth?

(a) The family grows faster ( )

(b) It has no effect on anyone else ( )

(c) You restrict the growth of the family ( )

(d) Men become more powerful ( )

10. What is the characteristic of a stationary population?

(a) Birthrate is declining ( )

(b) Birthrate = Death rate ( )

(c) Birthrate > Death rate ( )

(d) Birthrate < Death rate ( )

(SECTION : B—SHORT ANSWERS)

(*Marks* : 15)

Write short notes on *five*, taking at least *one* from each Unit : 3×5=15

UNIT—I

1. Optimum theory of population
2. Stages of demographic transition

UNIT—II

3. Civil registration system
4. National Family Health Survey

UNIT—III

5. Crude birthrate
6. Net reproduction rate

UNIT—IV

7. Concept of quasi-stationary population
8. Implications of India's aging population

(SECTION : C—DESCRIPTIVE)

(*Marks* : 50)

Answer *five* questions, taking at least *one* from each Unit : 10×5=50

UNIT—I

1. Critically explain Malthus theory of population. 10

2. Define demography. How is demography related to other disciplines? 3+7=10

UNIT—II

3. Discuss the features of population censuses in India since Independence, highlighting changes in coverage and findings. 10

4. Discuss the major sources of demographic data in India. Explain their significance and frequency of collection. 5+5=10

UNIT—III

5. Define age-specific birthrate and age-specific death rate. Explain their importance in understanding demographic trends. 5+5=10

6. Define Total Fertility Rate (TFR). Discuss the various factors influencing fertility rate in a developing country like India. 3+7=10

UNIT—IV

7. Explain the key features of the National Population Policy, 2000. Discuss the major challenges in its implementation. 8+2=10

8. Analyze the relationship between women's empowerment and population control in India. 10

★★★
