8. Read the passage given below and answer the questions that follow :

Climate change has emerged as one of the most pressing challenges facing humanity today. With rising global temperatures, shifting weather patterns, and increasing frequency of extreme weather events, the effects of climate change are becoming more evident. Scientists warn that if current trends continue, we could face catastrophic consequences, including widespread food shortages, loss of biodiversity, and increased health risks. The primary

driver of climate change is human activity, particularly the burning of fossil fuels which releases greenhouse gases into the atmosphere. Deforestation also contributes significantly by reducing the number of trees that can absorb carbon dioxide. To combat climate change, it is essential for governments, businesses, and individuals to take collective action. Efforts such as transitioning to renewable energy sources, enhancing energy efficiency, and promoting sustainable practices can mitigate the impacts of climate change. Public awareness campaigns are also crucial in educating communities about their role in combating this global crisis.

9. Write a précis of the following passage giving a suitable title : 8

As daylight can be seen through very small holes, so little things will illustrate a person's character. Indeed, character consists of little acts, well and honourably performed in our daily life. One of the most marked tests of character is the manner in which we conduct ourselves towards others. A graceful behaviour towards superiors, inferiors and equals is a constant source of pleasure. It pleases others because it indicates respect for their personality; but it gives tenfold pleasure to ourselves. Every man may, to a great extent, be a self-educator in good behaviour, as in everything else. He can be civil and kind, if he wills, though he may not have a penny in his purse. Even a kind look will give pleasure and confer happiness. Gentleness in society is like the silent influence of light which gives colour to all nature. It is far more powerful than loudness of force and hence, far more fruitful.
