2026

(NEP—2020)

(6th Semester)

PSYCHOLOGY (MAJOR)

(Research Methods in Psychology)

Full Marks : 75

Time : 3 hours

The figures in the margin indicate full marks for the questions.

(SECTION : A—OBJECTIVE)

(*Marks* : 10)

Tick (✓) the correct answer in the brackets provided : 1×10=10

1. Which of the following is not a characteristic of scientific research?

(a) Empirical ( )

(b) Objective ( )

(c) Subjective ( )

(d) Systematic ( )

2. A tentative statement showing a relationship between variables under the study is

(a) dependent variable ( )

(b) sampling ( )

(c) reliability ( )

(d) hypothesis ( )

3. _____ refers to an invisible physical or psychological buffer zone or boundary around a person.

(a) Privacy ( )

(b) Dilemma ( )

(c) Debriefing ( )

(d) Confederate ( )

4. _____ is a method of field observation or observation of observaion in natural setting.

(a) Ethnographic study ( )

(b) Survey ( )

(c) Case study ( )

(d) Interview ( )

5. A good research design should control the effects of _____ variables.

(a) dependent ( )

(b) independent ( )

(c) moderator ( )

(d) extraneous ( )

6. A measure based upon the entire population is called

(a) universe ( ) (b) sample ( )

(c) statistic ( ) (d) parameter ( )

7. The list containing all the sampling units is called

(a) sampling design ( )

(b) sampling frame ( )

(c) population ( )

(d) confidence interval ( )

8. _____ are people entrusted by a researcher to act as other subjects.

(a) Confidants ( )

(b) Research assistants ( )

(c) Confederates ( )

(d) Principal investigators ( )

9. For a dependent variable to be _____, it must change clearly when the independent variable changes.

(a) valid ( ) *(b)* sensitive ( )

(c) reliable ( ) *(d)* objective ( )

10. The simplest way to control extraneous variable is through

(a) elimination ( )

(b) balancing ( )

(c) randomization ( )

(d) differential treatment ( )

(SECTION : B—SHORT ANSWERS)

(*Marks* : 25)

Write on *five* of the following, taking at least *one* from each Unit : 5×5=25

UNIT—I

1. Goals/Objectives of scientific research/method
2. Types of reliability
3. Experimental method

UNIT—II

4. Purpose of research design
5. Need for sampling
6. Methods of drawing random samples

UNIT—III

7. Independent variable
8. Considerations in selection of variables
9. Counterbalancing

(SECTION : C—DESCRIPTIVE)

(*Marks* : 40)

Answer *four* of the following, taking at least *one* from each Unit : 10×4=40

UNIT—I

1. Discuss the different stages in the conduction of a research.

2. Discuss the APA ethical principles in the conduct of research.

3. Explain in detail any two methods of psychological research. 5+5=10

UNIT—II

4. Discuss between-subject and within-subject research designs. 5+5=10

5. Define sampling. Describe probability sampling methods. 2+8=10

6. What is non-probability sampling? Discuss the methods of non-probability sampling. 2+8=10

UNIT—III

7. What are variables? Discuss the different types of variables. 2+8=10

8. Discuss the important approaches to manipulating independent variables.

9. What are extraneous variables? Discuss any three methods in controlling them. 2+8=10

★★★
